

FLYNT

"I believe life is not meant to be directed by form, tradition, status or the outside world. The ultimate joy is to live free and to follow your nature in everything that you do."

A handwritten signature in white ink, appearing to read 'R. Sanders', with a long horizontal stroke extending to the right.

ROBERT-JAN SANDERS,
FOUNDER OF FLYNT

OUR STORY

Flynt is the brainchild of Dutch entrepreneur Robert-Jan Sanders and is the culmination of his life's work in the motor yacht industry. The brand draws on the power of following your truth. Its aim is to inspire owners who focus less on status but chase the thrill of understated enjoyment.

In creating Flynt, Robert-Jan united global specialists in international superyacht design and manufacturing selecting only the highest quality materials and state-of-the-art technologies. As the first model in a new line of arresting boats, Flynt 956 sets the benchmark high. By giving creative thought and freedom to every expression and detail, it raises the sport yacht bar in every way.

ENDLESS LINES FROM EVERY ANGLE

Much like the infinite ocean and horizon beyond, Flynt's exterior design is characterised by elegant, continuous flowing lines.

AMN

“ You can only **create** something **extraordinary**
if you let go of the status quo and **dare** to
follow your **natural instincts** in everything. ”

FLYNT

SPACIOUS SEATING AREA

Soft underfoot yet built to last, the exterior deck space offers space, comfort and a chic aesthetic. Made from custom cast fibre with a teak effect, sumptuous edge-to-edge seating provides ample room for guests to sit or lounge, while bespoke fabrics offer a contemporary and convenient ambience.

COMFORTABLE SUNDECK

Catch the wind in your hair and the sun on your face from the life-affirming view point of the sundeck. Located aft, it doubles up as two inviting sun loungers or transforms into a full-on sunpad. Just a stone's throw from the water's edge, it is ideal for sun worshippers looking to drop anchor, kick back and make the most of life at sea with a cocktail in hand.

JUNY

THE ULTIMATE DRIVER'S SEAT

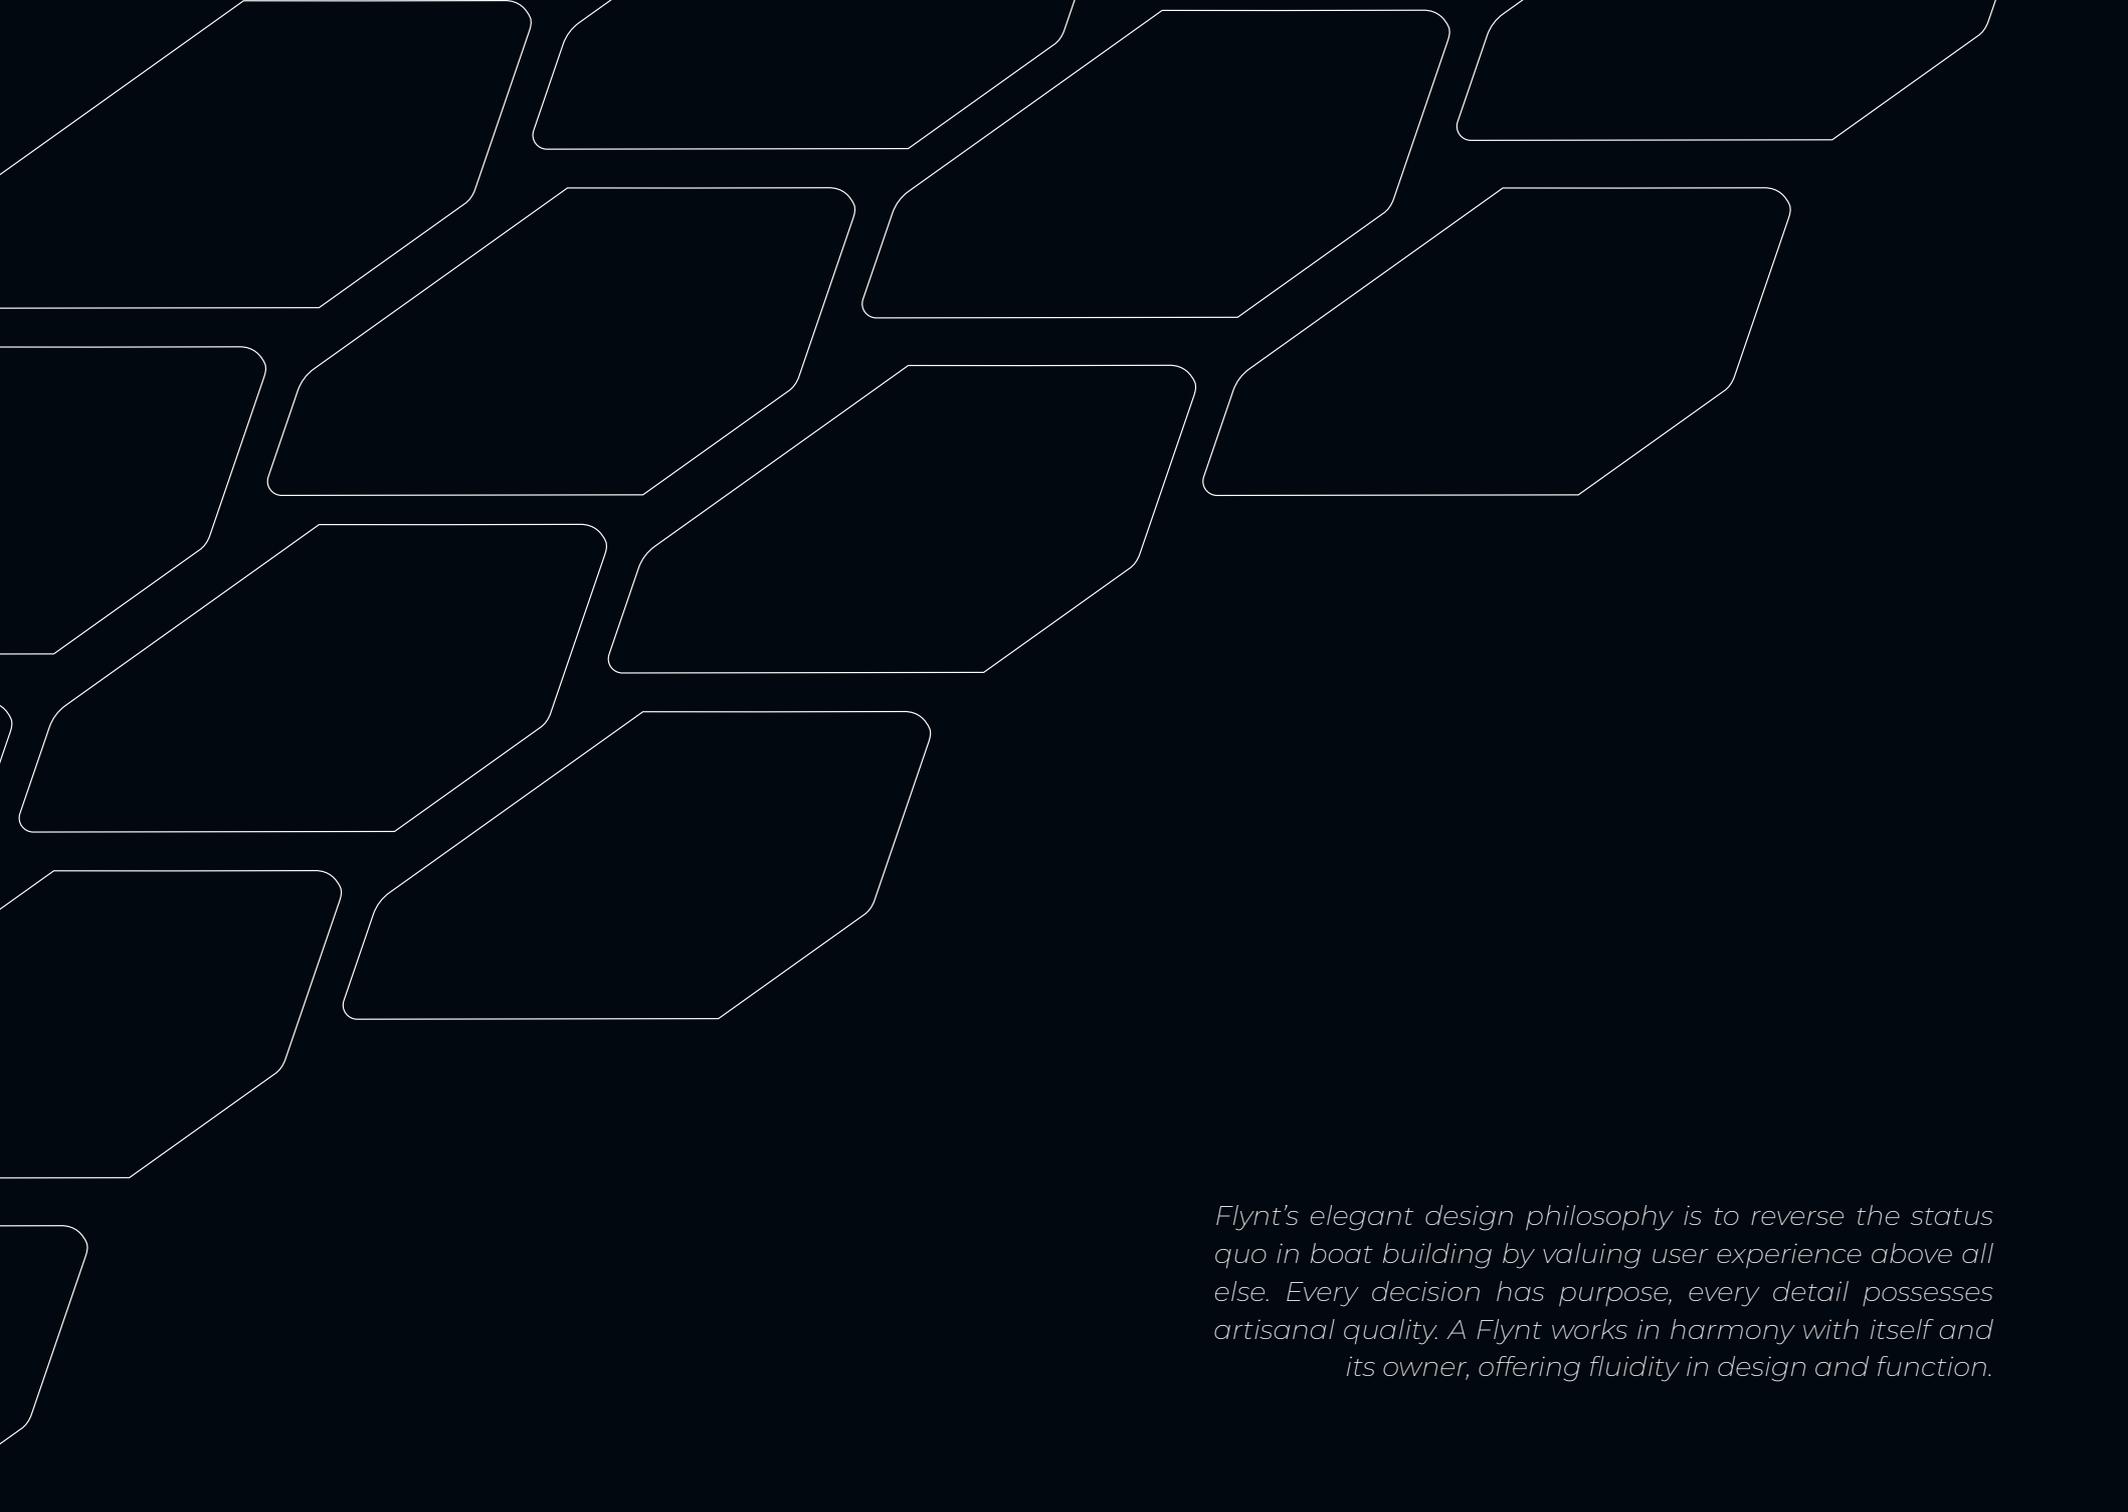

Flynt 956 places the owner at the helm of an adrenaline-filled experience. Two custom, fully adjustable and rotatable Recaro sport seats ensure a life-affirming driving experience. The free-standing wood-lined panoramic windshield affords clear visibility and stretching vistas. The high-gloss, leather-lined and fully-digital Simrad dashboard twins with a leather, sports steering wheel complete with a mirror and polished 3D logo for the finishing touch.

DESIGN PHILOSOPHY

Flynt's elegant design philosophy is to reverse the status quo in boat building by valuing user experience above all else. Every decision has purpose, every detail possesses artisanal quality. A Flynt works in harmony with itself and its owner, offering fluidity in design and function.

TECHNICAL SPECIFICATIONS

Flynt 956 offers a fully bespoke build, from the exterior paint job to the interior fabric selection. As each boat is made to order, virtually any custom colour, material or pattern can be selected to add a personalised sense of style and a true stamp of individuality.

The 956 is perfectly seaworthy at 32 ft. Moreover, her low weight and top speed of over 50 knots make her one of the fastest boats in her class.
